PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science student and AI engineer focused on building intelligent systems that predict problems before they happen. Combines machine learning, generative AI and modern full-stack engineering to turn complex ideas into clean, scalable products — from business decision intelligence and fraud detection to sustainability and planning tools. Currently a UI/UX Design Intern at FlyRank AI, a hackathon runner-up, and a designer who communicates ideas visually through design and video.

EXPERIENCE

UI / UX Design Intern — FlyRank AI — Jul 2026 – Nov 2026 · 20 weeks

- Selected for FlyRank AI's July 2026 internship program in the UI / UX Design track.
- Designing user interfaces and user experiences for AI-driven products as part of the program.

PROJECTS

Veixon Co-Founders — AI planning platform for early-stage founders — veixon-cofounders.vercel.app ↗

- Built an AI assistant that guides early-stage founders from a raw idea to early execution.
- **Idea analysis & validation** — evaluates an idea and surfaces strengths, risks and gaps.
- **90-day execution planning** — turns the idea into a structured, time-boxed roadmap of actionable steps.
- **Decision simulation** and an **accountability dashboard** that compares options and tracks progress against the plan.

Stack: AI/LLM workflows · Web dashboard · Deployed on Vercel

EcoConnect AI — AI-powered waste management platform — Hackathon project

- Designed a platform that connects citizens, delivery agents and NGOs/industries so collected scrap reaches the recyclers that need it.
- **User portal** — citizens scan and upload garbage to raise a pickup. **NGO / Industry portal** — verified industries register the waste types they want and enrol service areas.
- **Delivery portal** — location-based agents with registered vans get batched bulk pickups to cut extra travel; the hub is notified on each drop.
- Built a 3D, scroll-driven WebGL landing page and role-based signup that routes each user to the right portal.

Stack: AI image-based waste reporting · WebGL · Role-based web app

VISIONIX Decisions — AI business intelligence platform — In development

- AI-powered BI platform that combines predictive analytics with intelligent automation to turn business data into forward-looking recommendations.

Stack: Python · Machine Learning · Predictive Analytics · Full Stack

Chakravyuh — AI fraud detection system

- Detects suspicious activity and fraud patterns using machine learning and behavioural analysis, flagging anomalies early before they cause losses.

Stack: Machine Learning · Pattern Detection · Behavioural Analytics

IntelliRecipe — AI recipe generator

- Generates personalised recipes from the ingredients a user has, their taste preferences and dietary requirements.

#DFA2Z — AI drone services platform — Upcoming

- AI-based drone service platform delivering aerial solutions and intelligent automation for diverse industries.

HACKATHONS & ACHIEVEMENTS

Runner-up — AI Hackathon — Bower School of Entrepreneurship × STUDLYF, Meridian School — May 2026

- Secured runner-up position in a two-day AI hackathon (9–10 May 2026), recognised for innovation, problem-solving and teamwork.

- **Beyond Agentic** — Microsoft AI Innovators Hub × Databricks, Microsoft Campus Hyderabad (Oct 2026)
- **Samsung Solve for Tomorrow 2026** — design-thinking innovation programme
- **Pitch Night** — Google Student Ambassador Program 2026 (May 2026)
- **Summer Hackathon 2026** — SpectrumCircle

CERTIFICATIONS

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

Introduction to Machine Learning: Art of the Possible — May 2026
AWS Training & Certification
ML fundamentals, the end-to-end ML lifecycle and how ML is applied to real business problems on AWS.

Getting Started with AI on Jetson Nano — Dec 2025
NVIDIA Deep Learning Institute
Edge AI on an embedded GPU — collecting image data, training and deploying classification and regression models with PyTorch. Verify ↗

Introduction to Modern AI — May 2026
Cisco Networking Academy
AI/ML concepts, object detection and image segmentation, machine translation, how LLMs work, multimodal prompting and LLMs with tools.

Introduction to Generative AI — Jul 2026
IBM SkillsBuild · 4 learning hours
Foundations of generative AI — how generative models create text and images, their uses and their limitations.

Generative AI Mastermind — 2026
Outskill
Practical generative-AI tools and workflows for building, automating and creating with AI.

ChatGPT Generative AI for Business Leaders — May 2026
Udemy · 2 hours
Gen AI primer — applying ChatGPT and generative AI to business use cases, strategy and productivity.

Claude 101 — 2026
Anthropic
Working effectively with Claude — prompting, everyday workflows and practical use cases.

Microsoft Learn — AI fundamentals (3 modules) — May 2026
Microsoft
Introduction to AI concepts · Explore AI basics · Introduction to generative AI and agents.

SOFTWARE DEVELOPMENT & SECURITY

Java DSA Course — Master the Fundamentals — May 2026
Scaler Topics · Certificate of Excellence
Data structures and algorithms in Java — 94 video tutorials, 12 modules and 7 coding challenges.

Full-Stack Development 101 — May 2026
Simplilearn
Front-end building blocks, back-end and server concepts, databases and how the layers connect.

Cyber Security Job Simulation — Nov 2025
Deloitte (Forage)
Investigated a security breach by analysing web-activity logs for suspicious behaviour. Code: HcyJrfExZ8gAQJTYj.

Python (Basic) · Java (Basic) — Jul · Oct 2025
HackerRank skill certifications
Python data types, control flow, collections and functions; Java classes, objects, methods and OOP principles.

TECHNICAL SKILLS

Languages	Python, Java, C++, JavaScript, TypeScript
Web & Frameworks	React, Next.js, Flask, Three.js, Tailwind CSS, REST APIs
AI / ML	Machine Learning, Generative AI, LLMs & Prompt Engineering, AI Agents, Predictive Analytics, Anomaly Detection, Edge AI (Jetson Nano)
Cloud & Tools	Firebase, Vercel, AWS (fundamentals), Git & GitHub
Design & Product	UI/UX Design, Product Design, System Design, Design Thinking

OTHERS — DESIGN & EDITING

Graphic Design	Canva — social media creatives, posters, presentations and brand visuals
Photo Editing	Adobe Photoshop — photo retouching, compositing and image manipulation
Video Editing	DaVinci Resolve — video editing, colour grading and promo videos
Typing	67 WPM at 97% accuracy (typing.com, verified)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering — 3rd Year · Pursuing

Focus areas: Artificial Intelligence, Machine Learning, Full Stack Development

STRENGTHS

- Building products end to end, from idea to launch
- Translating complex problems into simple, usable AI tools
- Fast learner — 15 certifications across AI, development and security
- Visual communication through design and video
